

ALVIN GIOVANNI

Senior Growth Analyst | Growth & Product Analytics

Jakarta, Indonesia | +62 878-5522-9898 | alvingiovanni@outlook.com | linkedin.com/in/alvingiovanni | alvingiovanni.github.io

PROFESSIONAL SUMMARY

Senior Growth Analyst with 5+ years in growth, product, and marketing analytics across fintech (Tokopedia/ByteDance) and consumer technology (Mindvalley). Proven track record of building company-wide analytics frameworks, translating complex data into strategic business decisions, and deploying machine learning and AI solutions. Experienced in leading cross-functional initiatives with expertise spanning growth analytics, customer segmentation, revenue attribution, and AI-enabled decision support.

PROFESSIONAL EXPERIENCE

Senior Growth Analyst · Mindvalley, Remote (2024 – Present)

Analytics partner to C-suite leaders in Marketing, Product, and Data on acquisition, lifecycle, pricing, and growth investment.

Stack: SQL, Python, dbt, Airflow, GCP, Metabase.

- **Rebuilt trust in core marketing and revenue data**, by surfacing missing acquisition sources, reconcile revenue, quantified leakage from payment and checkout failures, and standardized acquisition, retention, and revenue reporting.
- Built a validated **marketing mix model and multi-touch attribution framework**; surfacing underinvested channels and redirected investment, contributing to ~20% revenue growth in those channels and a 12% gain in marketing efficiency.
- Standardised **LTV and CAC measurement** across business units and regions. Utilized to prioritise pricing and offer timings, improving 90-day LTV by 11% over the following two quarters.
- Developed a **lead-scoring model that tiers leads by readiness and warms cold leads** with non-sales content before sales outreach, lifting lifecycle conversion by 14%, and sales-email conversion by 26%.
- Led an **acquisition funnel diagnostics initiative** covering incrementality, pricing, and upsell economics, increasing funnel efficiency by 22% and funnel revenue by 8%.
- Developed an **internal self-serve data analytics application with AI-generated insights** and a conversational data agent, cutting time to insight from 1–2 days to under one hour; ~80% of recurring leadership questions are now self-service.

Data Analyst, Fintech · Tokopedia (ByteDance), Jakarta, Indonesia (2021 – 2024)

End-to-end analytics owner for Merchant Lending and Buy Now Pay Later (BNPL), working across business, product, marketing, data engineering, and data science.

- Partnered with Product and Business leadership on growth opportunities and product strategy, supporting the **scaling of BNPL to ~USD 200M in two years**.
- Developed **BNPL behavioral personalisation model** adopted across Product, Marketing, and Business. Enabling targeted and personalized product experience and marketing messaging, increasing revenue by 26% on tested cohorts.
- **Led a cross-functional analyst team in building company-wide channel affinity model** that routed campaigns to each user's lowest-cost, highest-affinity channel, reducing marketing spend by 12% while lifting conversion by 20%.
- Built a **conversion-propensity model predicting each user's likelihood to transact** in the following week, tiered promo values by propensity, and deployed the tiers directly into CRM platforms, raising net revenue after promotion costs by ~5%.
- **Recognition:** Bytedance Individual Spot Performance Award (2024); Tokopedia IDEAL Execute Award (2023)

Operations Analyst · RPX–FedEx, Jakarta, Indonesia (2019 – 2020)

Analytics for operational efficiency and logistics network expansion across Indonesia.

Assistant Project Manager · Tatamulia, Jakarta, Indonesia (2017 – 2018)

Coordinated cross-functional teams; built data-backed reporting for project quality and delivery.

SKILLS

Growth & Marketing Analytics: LTV/CAC, multi-touch attribution, marketing mix modeling, A/B testing & experimentation, funnel & cohort analysis, lead scoring, customer segmentation, revenue attribution

Data, AI & ML: SQL, Python, dbt, Airflow, GCP, propensity & churn modeling, LLM & agentic AI applications

BI & Stakeholders: Tableau, Power BI, Looker Studio, Metabase; executive stakeholder management

EDUCATION & CERTIFICATION

Bachelor of Civil Engineering · Universitas Pelita Harapan, Indonesia (2013 – 2017)
